and (2) these devices must accept any interference received, including interference that may cause
undesired operation.
- (3) Responsible party in the USA is:
WIBU-SYSTEMS USA, Inc., 2429 NW 197th Street, Shoreline WA 98177, Phone +1-206-546-4891, E-
Mail: info@wibu.us, Attn: Marcellus Buchheit
The Test Reports 3286G_1 and 3286G_2 from VDE Testing and Certification Institute, Offenbach,
Germany, dated 2000-06-30 and the Certificate CAB00-002 from CKC Certification Services dated
November 30, 2000 show compliance with FCC Part 15, Subpart B.

Notice to users

The devices (WIBU-BOXes) have been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. The device generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

These devices have been certified to comply with the limits for a class B computing device, pursuant to FCC rules. In order to maintain compliance with FCC regulations, shielded cables must be used with the equipment if not connected directly to the PC. Operation with unshielded cables is likely to result in interference to radio and television reception.

The user is cautioned that changes and modifications made to the device without the approval of the manufacturer could void the user's authority to operate this device.
