

Wibu-Systems with Minister Miao Wei at IIMC Beijing

Made in China 2025 and Industry 4.0 are tremendous challenges, making Protection, Licensing, and Security absolute must-haves. Oliver Winzenried, CEO of Wibu-Systems AG and Wibu-Systems (Shanghai) Co., Ltd. discussed these topics with Miao Wei, MIIT, in Beijing on 11th May. Safeguarding the know-how of products, machines, and processes against counterfeiting, reverse engineering, and tampering has gained top priority. Creating new business models based on software-realized product features is also a great opportunity for all intelligent device manufacturers. Wibu-Systems supports Miao Wei's mission for China to become a mature manufacturing leader, cooperate with the global community, as well as standardization.
